**Email:** shahyash4@ibm.com

## Profile

DevOps and Cloud Infrastructure professional with over 8 years of experience across enterprise IT, cloud operations, and automation engineering. Currently serving as Senior Consultant at IBM, with hands-on expertise in Azure Landing Zone, Azure Service Catalog, Azure Workbook, and CI/CD pipeline development using Azure DevOps. Proven track record in cloud migrations (on-premises to Azure/AWS), Infrastructure as Code using Terraform, and container orchestration with Kubernetes and Docker. Experienced in managing large-scale data center operations, handling critical outages, and implementing Zero Trust security models. Holds AWS Certified Solutions Architect – Associate certification. Adept at working across multi-cloud environments (Azure and AWS), driving automation initiatives, and delivering scalable, secure cloud infrastructure solutions for enterprise clients.

## Key skills

### Cloud Platforms & Services

- Microsoft Azure: Azure DevOps, Azure Landing Zone, Azure Service Catalog, Azure Workbook, Azure Key Vault, Azure App Registration
  - AWS: IAM, VPC, ECR, EKS, RDS, Security Hub, CloudWatch, CloudFormation
- ### Infrastructure as Code (IaC)
- Terraform (3+ years) — Cloud Adoption Framework design and implementation
  - Automated provisioning across AWS and Azure environments

### CI/CD & DevOps

- Azure DevOps Pipelines — end-to-end pipeline design, automation, and management
- Jenkins (working knowledge)
- Git — version control and repository management

### Containerization & Orchestration

- Docker — Dockerfile creation, image automation, containerization of applications
- Kubernetes — Amazon EKS cluster setup, Cluster Auto Scaling, HA deployments
- HashiCorp Vault — HA setup in Kubernetes

### Monitoring & Observability

- SolarWinds, Nagios, New Relic, Grafana, Zabbix, Steampipe, Argus
- ### Security

- Zero Trust security implementation on AWS
- Key Vault secret and certificate lifecycle management

### Operating Systems & Scripting

- Linux administration
- Bash scripting

## Education

Bachelor of Engineering (B.E.),  
Electronics and Communication  
Engineering, SAL Institute of  
Technology & Engineering Research,  
IN, 2015

Higher Secondary Certificate (H.S.C.),  
Science, Gujarat State Education  
Board, IN, 2009

Secondary School Certificate (S.S.C.),  
General Stream, Gujarat State  
Education Board, IN, 2007

## Languages

English - Fluent

Hindi - Fluent

## Industry Experience

Healthcare - Experienced

Energy, Environment & Utilities -  
Experienced

## Memberships

Amazon Web Services (AWS), AWS  
Certified Solutions Architect –  
Associate

#### Data Center & Infrastructure Operations

- On-premises to cloud migration (Windows Server 2012 R2 → Azure)
- Multi-data center management (13 US data centers)
- Outage handling across on-premises and cloud (Azure & AWS)
- Performance analysis and server-level issue resolution

## Key courses and training

#### Certifications:

- AWS Certified Solutions Architect – Associate (Active)

#### Relevant Training & Knowledge Areas:

- Microsoft Azure Fundamentals and Advanced Architecture (self-directed + project-based)
- Terraform for Infrastructure as Code — hands-on delivery across AWS and Azure projects
- Monitoring and Observability tooling — SolarWinds, New Relic, Grafana (hands-on across 5+ years)

## Work experience

### Senior Cloud Consultant

IBM | September 2026 - Present

Currently working as a Senior Consultant at IBM, contributing to enterprise-grade cloud infrastructure and automation initiatives. Key responsibilities and achievements include:

- Developed and maintained Azure Service Catalog and Azure Workbook solutions for operational visibility and self-service provisioning.
- Built and managed end-to-end CI/CD pipelines using Azure DevOps for automated infrastructure and application deployments.
- Collaborated with cross-functional teams to deliver cloud solutions aligned with client business requirements and IBM delivery standards.

### DevOps Engineer

DynaTech Systems, India | Apr 2023 - Sep 2025

Worked as a DevOps Engineer responsible for cloud and automation across Azure environments. Key responsibilities and achievements include:

- Designed and developed Azure DevOps Pipelines to automate fetching and rotation of Azure Key Vault secrets, keys, and App Registration credentials.
- Built and delivered Cloud Adoption Framework (CAF) for Azure using Terraform, enabling standardized and governed cloud infrastructure provisioning.
- Automated secret lifecycle management reducing manual effort and improving security compliance across Azure subscriptions.

### Senior DevOps Engineer

SeaFlux Technologies, India | Dec 2022 - Apr 2023

Served as Senior DevOps Engineer responsible for cloud automation, security, and CI/CD implementation on AWS. Key responsibilities and achievements include:

- Automated collection and forwarding of logs and metrics from host machines and Docker Daemon to centralized monitoring platforms.
- Implemented CI/CD pipelines for automated software deployments and continuous updates across environments.
- Designed and deployed Zero Trust security architecture for secure AWS console access, minimizing attack surface and vulnerabilities.
- Automated MongoDB database backup storage to AWS S3, ensuring data durability and recovery readiness.
- Converted existing manual infrastructure into Terraform code and delivered via CI/CD pipelines in AWS Cloud.

## **DevOps Engineer**

FasTraxs Infotech, India | Apr 2022 - Nov 2022

Worked as a DevOps Engineer focused on containerization, Kubernetes orchestration, and cloud infrastructure automation. Key responsibilities and achievements include:

- Rebuilt the entire existing application platform by migrating to Docker containers and deploying on Kubernetes for improved scalability and resilience.
- Created Dockerfiles and automated Docker image builds using Azure DevOps pipelines.
- Automated infrastructure provisioning on AWS using Terraform.
- Set up and managed Kubernetes clusters on Amazon EKS with Cluster Auto Scaling for dynamic workload management.
- Designed and maintained CI/CD pipelines in Azure DevOps for automated application delivery.
- Configured Azure Git repositories and prepared them for production-ready deployments.

## **System Administrator and Cloud Operations Engineer**

eClinicalWorks Pvt Ltd, India | Apr 2017 - Apr 2022

Worked as System Administrator and CloudOps Engineer managing large-scale on-premises and cloud infrastructure across US data centers. Key responsibilities and achievements include:

- Managed and monitored 13 data centers across the United States, ensuring high availability and operational continuity.
- Handled critical outages across both on-premises infrastructure and cloud platforms (Azure and AWS), minimizing business impact and ensuring rapid resolution.
- Administered and operated monitoring tools including SolarWinds, Nagios, Argus, Grafana, and New Relic for proactive infrastructure health management.
- Performed server-level performance analysis and root cause investigation for infrastructure incidents.
- Supported hybrid cloud operations bridging on-premises data center environments with Azure and AWS cloud platforms.

## **System Administrator**

Braintec Labs, India | Jan 2016 - Feb 2017

Worked as System Administrator responsible for managing and maintaining on-premises

IT infrastructure. Key responsibilities include:

- Administered and maintained on-premises hardware infrastructure including servers, storage, and networking equipment.
- Managed network infrastructure including configuration, troubleshooting, and maintenance to ensure reliable connectivity and uptime.
- Provided day-to-day IT support and ensured operational stability of the internal infrastructure environment.

## **Network Administrator and System Engineer**

HSB Infotech Pvt Ltd, India | Jun 2015 - Dec 2015

Worked as Network Administrator and System Engineer on telecom and enterprise client projects. Key responsibilities include:

- Delivered network engineering services for Reliance JIO Infocom Limited, including router and switch configuration and deployment.
- Provided on-site desktop support and system administration as a Wipro-residing engineer at Gruh Finance Ltd, managing end-user hardware and software issues.
- Configured and maintained network devices ensuring stable and secure connectivity across client sites.
